September 25, 2018

Harvest time is upon us! Here is your 2018 PRODUCTION REPORT. This is the same information you received when we mailed your schedule of insurance. This report shows your Guaranteed Bushels Per Acre, Total Bushels Guaranteed and Total Revenue Guaranteed based on the \$3.96 corn & \$10.16 soybean Spring Prices. For those of you with **REVENUE PROTECTION** policies, if the harvest price is set below the spring price – your original bushel guarantee increases to insure you make your Total Revenue Guarantee shown on your Production Report. The current price decline on soybeans has the potential of adding 10 bushel per acre to your guarantee. The Harvest Price is announced the 1<sup>st</sup> week of November. The harvest price is the average daily price of the November Soybean and the December Corn contracts during the month of October. You may have completed harvest before the harvest price is set.

If you **suspect** a possible loss and want to **avoid having to leave strips**, please call our office, prior to harvest. All claims should be turned in **15 days before** you **harvest** the field. If there is any question don't hesitate to call us, as it is easier to withdraw a claim than it is to submit one after the fact. Make sure you discuss with your adjuster what you are using for records at harvest so you are not missing important information when it's time to get paid i.e. what are you using to prove test weight and moisture? If you need a sample to use as a daily load log, let us know. Hard records such as scale tickets, settlement sheets, bin measurements, appraisals, or truck load summaries will be needed to work losses.

**\*\*NEW\*\*** The FSA has announced a Market Facilitation Program (MFP) which will apply to corn and soybeans. To get your MFP payment you will need to sign up at FSA prior to January 15, 2019. Let us help you make it a one stop process. When you report your yields to us, we will have MFP applications on hand. We will give you a copy of your signed production along with your total bushels for your share of each crop to be reported with the application at the FSA office. You will be reporting your total bushels on your share of each crop in the entire country, not by county. Your landlords will need to know their share of their bushels.

**If you have any old crop in a bin make sure we measure it before you put new crop on top of old crop.**

**Please complete the attached PRODUCTION REPORT form as you complete your harvest. You will need to sign, date, and return this form to us.** Keep in mind that yields may vary from unit to unit. If good records are kept at harvest, our adjusters can provide quick and efficient service to you at claim time.

Thank you for the trust you have shown in our agency by placing and keeping your business with us.

Wishing you a safe harvest,  
Janis, Linda, Bonnie, & Emily
